Loan Volumes

In the first quarter of 2009, 10,997 loans were drawn down. This represents 41.2% fewer loans drawn down compared with the previous quarter, and 61.4% less than in the same period in 2008. Due to the seasonal patterns of mortgage lending, activity tends to be lower in the first quarter of the year when compared with the preceding period.

- First-time buyers (FTBs), mover-purchasers and top-ups experienced a slower rate of decline which is reflected in their increased market share of the number of loans issued.
- FTBs increased their market share for the fourth successive quarter and now account for 21.4% of the number of loans drawn down.
- Both the residential investment letting (RIL) and re-mortgage (switching) segments continued the trend established in Q1 2008 with both segments losing market share.
- Top-ups remain the largest segment in terms of the volume of loans issued.
